## Interesting Woodturning Opportunity

Hello everyone,

I've just gotten a request from a colleague at the U.S. Forest Service to try to locate a woodturner for a special custom order. Top folks at the USFS Northeastern Office travel a great deal and regularly meet with

natural resource managers from other regions in the US and around the world. They would like to have a small gift to show their appreciation to their partners, while also showing the fine resources and craftspeople we have in this region. They have an event coming up right away and are wondering if it would be possible to have 20-25 pens made from local ash wood and delivered to Philadelphia by June 24. I know that this request comes on a VERY short notice, but I thought I'd at least pass the word around. Ideally, they'd like to have ~20-25 pens now, and maybe up to 100 more at a later date.

At best case scenario, they would like to imprint the pens with the following:

- the USFS shield logo (see: <http://www.fs.fed.us/> in top right corner)
- Northeastern Area
- State and Private Forestry

They are hoping to pay around \$25/pen.

Would anyone be interested or know of others who might be? Please let me know as soon as possible and I can give you more details. Please feel free to forward this message widely.

## Ash and Cherry wood Available

Dear Mr. Mogford,

Like a lot of Ann Arborites, we have an Ash tree that needs to be dealt with creatively or otherwise. Standing immediately next to the Ash is a Cherry- not the eating variety. Each tree measures 70 inches around at two feet above ground and are over 50 feet tall before their diameters get below 10 inches. They are very straight.

The trees are somewhat dependent upon each other. Two removal services have advised that the Cherry also be removed as it could pose a threat to our house and to our neighbors.

We have thought about a chain saw sculpture or two. Even with this, there would still be a lot of desirable material above the sculpture top. Would any of your artisans want the Ash or Cherry wood to work into things of beauty? We also understand some lumber companies are making railroad ties, beams, etc. Would anyone in your organization be interested in either wood or do you know anyone who does the chain saw sculptures we see in yards?

Do you have any names or other suggestions for this wood? We would pay to have the trees cut as directed by the sculptor or the artist. It seems a shame to throw away this wood.

Thank you for any help you can give us.
