Meeting Announcements

MAW 4th Annual Picnic EXCELLENT!!

A good time was had by all attendee's at the 4th annual MAW picnic held at the meeting site in Holly.

Great friends and great food made for a wonderful afternoon.

Some interesting items were also brought in for the "Show & Tell" table.

Pictures of the event are shown on this and previous pages of the newsletter.

Thanks to all that attended.

Re: Turning 2007 in Cincinnati, October 12, 13, 14, 2007

This is a reminder that if your members have not registered for our Symposium this fall, there is still time. We have booked a great cast of turners which include Trent Bosch, Nick Cook, Clay Foster, Matthew Hill, Mark Kauder, Graeme Priddle, Mark Sfirri, and Molly Winton.

In the past we have filled up, but this year we have increased the quota by about 25 due to the new larger dining hall.

We still have about 50 spaces left and a few dorm beds. The motel on site is filled. If some of your members desire to attend, please encourage them to send in their registrations. We would appreciate it if you could advertise this in your newsletter and announce it at any upcoming meetings.

Our web site is www.ovwg.org where they can download the registration form. Thanks for your help.

Quick & Easy Threaded Inserts For Urns

Here's how I put ABS plastic threaded inserts on my urns. Sorry for the poor photos but this was a quickie. Please note I do most of my turning outboard so the perspective may confuse you a bit.

Start with a 1 1/2" ABS drain pipe cleanout available from any hardware store.

Mount the female part in expansion jaws. Use a scraper to remove the little gripper knobs and the raised lettering on the face of the female part. Cut a 1/8" deep groove about 1/8" in from the face of the piece to create a flange.

Then part the piece of about ¼" thick.

Here are the female threads glued into the neck of the urn.

Grip the square end of the male part in a chuck.

Part off about $\frac{1}{4}$ " of the male threads.

Turn a tennon on the underside of the urn lid to fit the male threads. You can then reverse the lid and use the tennon to hold the lid while turning the top side.
